

Rules:

1. If the animal is a vertebrate
And it is warm blooded
And it breastfeed its offspring
And it eats meat/insects
And it can fly
Then the animal is bat.
2. If the animal is a vertebrate
And it is warm blooded
And it breastfeed its offspring
And it eats meat/insects
And it cannot fly
And it has opposing thumb
And it has prehensile tail
Then the animal is monkey
3. If the animal is a vertebrate
And it is warm blooded
And it breastfeed its offspring
And it eats meat/insects
And it cannot fly
And it has opposing thumb
And it has no prehensile tail
And it is nearly hairless
Then it is not animal but a man
4. If the animal is a vertebrate
And it is warm blooded
And it breastfeed its offspring
And it eats meat/insects
And it cannot fly
And it has opposing thumb
And it has no prehensile tail
And it has powerful arms
Then animal is an orangutan/gorilla/baboon
5. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it eats meat/insects
And it cannot fly
And it has opposing thumb
And it has no prehensile tail
And it has no powerful arms
Then animal is a baboon

6. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it eats meat/insects
And it cannot fly
And it has no opposing thumb
And it weights more than 400 pounds
And it lives on land
And it can stand on hind leg to get a better view
Then the animal is a sun bear

7. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it eats meat/insects
And it cannot fly
And it has no opposing thumb
And it weights more than 400 pounds
And it lives on land
And it cannot stand on hind leg to get a better view
Then the animal is a tiger

8. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it eats meat/insects
And it cannot fly
And it has no opposing thumb

And it weights more than 400 pounds

And it does not lives on land

Then the animal is a walrus

9. If the animal is a vertebrate

And it is warm blooded

And it breastfeed its offspring

And it eats meat/insects

And it cannot fly

And it has no opposing thumb

And it does not weights more than 400 pounds

And it has thin tail

Then it is a cat

10. If the animal is a vertebrate

And it is warm blooded

And it breastfeed its offspring

And it eats meat/insects

And it cannot fly

And it has no opposing thumb

And it does not weights more than 400 pounds

And it has no thin tail

And it can bark and raised as pet

Then the animal is a dog

11. If the animal is a vertebrate

And it is warm blooded

And it breastfeed its offspring

And it eats meat/insects

And it cannot fly

And it has no opposing thumb

And it does not weights more than 400 pounds

And it has no thin tail

And it cannot bark and not raised as pet

Then the animal is a coyote/fox/wolf

12. If the animal is a vertebrate

And it is warm blooded

And it breastfeed its offspring
And it does not eats meat/insects
And it has no hooves
And it does not lives in water
And it has large frontal teeth
And it has a pouch
Then the animal is a kangaroo/koala bear

13. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it does not eats meat/insects
And it has no hooves
And it does not lives in water
And it has large frontal teeth
And it has no pouch
Then the animal is a mole/shrew

14. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it does not eats meat/insects
And it has no hooves
And it does not lives in water
And it has large frontal teeth
And it has a large ears
Then the animal is a rabbit

15. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it does not eats meat/insects
And it has no hooves
And it lives in water
And it is commercially hunted
Then the animal is a whale

16. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it does not eats meat/insects
And it has no hooves
And it lives in water
And it is commercially hunted
Then the animal is a dolphin

17. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it does not eats meat/insects
And it has hooves
And it has two hooves per foot
And the hooves is protected by protective plating
Then the animal is a horse/zebra

18. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it does not eats meat/insects
And it has hooves
And it has two hooves per foot
And the hooves are not protected by protective plating
Then the animal is a rhinoceros

19. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it does not eats meat/insects
And it has hooves
And it has two hooves per foot
And it has horns
And it has wool
Then the animal is a sheep

20. If the animal is a vertebrate

And it is warm blooded

And it breastfeed its offspring
And it does not eats meat/insects
And it has hooves
And it has two hooves per foot
And it has horns
And it has no wool
And it is domesticated
Then the animal is a cow

21. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it does not eats meat/insects
And it has hooves
And it has two hooves per foot
And it has horns
And it has no wool
And it is not domesticated
Then the animal is a deer/moose/antelope

22. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it does not eats meat/insects
And it has hooves
And it has two hooves per foot
And it has no horn
And it lives in deserts
Then the animal is a camel

23. If the animal is a vertebrate

And it is warm blooded
And it breastfeed its offspring
And it does not eats meat/insects
And it has hooves
And it has two hooves per foot
And it has no horn

- And it lives in deserts
Then the animal is a giraffe
24. If the animal is a vertebrate
And it is not warm blooded
And it lives in water
And it has bones
Then the animal is a fish
25. If the animal is a vertebrate
And it is not warm blooded
And it lives in water
And it has no bones
Then the animal is a shark
26. If the animal is a vertebrate
And it is not warm blooded
And it does not live in water
And it has scale skin
And it can jump
Then the animal is frog
27. If the animal is a vertebrate
And it is not warm blooded
And it does not live in water
And it has scale skin
And it cannot jump
And it has limbs
Then the animal is an eel
28. If the animal is a vertebrate
And it is not warm blooded
And it does not live in water
And it has scale skin
And it cannot jump
And it has no limbs
Then the animal is a salamander.
29. If the animal is a vertebrate
And it is not warm blooded

And it does not live in water
And it has no scale skin
And it has shell
And its shell is rounded shape
Then the animal is turtle

30. If the animal is a vertebrate
And it is not warm blooded
And it does not live in water
And it has no scale skin
And it has shell
And its shell is not rounded shape
Then the animal is tortoise

31. If the animal is a vertebrate
And it is not warm blooded
And it does not live in water
And it has no scale skin
And it has no shell
And it has no limbs
Then the animal is a snake

32. If the animal is a vertebrate
And it is not warm blooded
And it does not live in water
And it has no scale skin
And it has no shell
And it has limbs
Then the animal is a crocodile/aligator

33. If the animal is not a vertebrate
And it lives in soil
And it has flat body
Then animal is flatworm

34. If the animal is not a vertebrate
And it lives in soil
And it has no flat body
And it suck blood from skin

Then the animal is leech

35. If the animal is not a vertebrate

And it lives in soil

And it has no flat body

And it does not suck blood from skin

Then the animal is earthworm

36. If the animal is not a vertebrate

And it does not live in soil

And its body is several segments

And it has shell

And it has tail

Then animal is a crab

37. If the animal is not a vertebrate

And it does not live in soil

And its body is several segments

And it has shell

And it has tail

Then animal is a lobster

38. If the animal is not a vertebrate

And it does not live in soil

And its body is several segments

And it has no shell

And it has 6 legs

And it can fly

And it has harden wing

Then animal is beetle

39. If the animal is not a vertebrate

And it does not live in soil

And its body is several segments

And it has no shell

And it has 6 legs

And it can fly

And it has no harden wing

And it has yellow and black stripe

And it suck nectars from flower

Then animal is bee

40. If the animal is not a vertebrate

And it does not live in soil

And its body is several segments

And it has no shell

And it has 6 legs

And it can fly

And it has no harden wing

And it has yellow and black stripe

And it does not suck nectars from flower

Then animal is wasp

41. If the animal is not a vertebrate

And it does not live in soil

And its body is several segments

And it has no shell

And it has 6 legs

And it can fly

And it has no harden wing

And it has no yellow and black stripe

And it sucks nectar

Then animal is butterfly

42. If the animal is not a vertebrate

And it does not live in soil

And its body is several segments

And it has no shell

And it has 6 legs

And it can fly

And it has no harden wing

And it has no yellow and black stripe

And it does not suck nectar

And it feeds on plant

Then the animal is grasshopper

43. If the animal is not a vertebrate

And it does not live in soil
And its body is several segments
And it has no shell
And it has 6 legs
And it can fly
And it has no harden wing
And it has no yellow and black stripe
And it does not suck nectar
And it does not feeds on plant
And it sucks blood from human/animal
Then animal is mosquito

44. If the animal is not a vertebrate

And it does not live in soil
And its body is several segments
And it has no shell
And it has 6 legs
And it can fly
And it has no harden wing
And it has no yellow and black stripe
And it does not suck nectar
And it does not feeds on plant
And it does not suck blood from human/animal
Then animal is housefly

45. If the animal is not a vertebrate

And it does not live in soil
And its body is several segments
And it has no shell
And it has than 6 legs
And it has waist
Then animal is ant

46. If the animal is not a vertebrate

And it does not live in soil
And its body is several segments
And it has no shell

And it has than 6 legs

And it has no waist

Then animal is termite

47. If the animal is not a vertebrate

And it does not live in soil

And its body is several segments

And it has no shell

And it has more than 6 legs

Then animal is centipede/milipede

48. If the animal is not a vertebrate

And it does not live in soil

And its body is not in several segments

And it has multiple cells for digesting food

And it is permanently attached to an object

And it has spikes

Then animal is sea anemone

49. If the animal is not a vertebrate

And it does not live in soil

And its body is not in several segments

And it has multiple cells for digesting food

And it is permanently attached to an object

And it has no spikes

Then animal is coral/sponge

50. If the animal is not a vertebrate

And it does not live in soil

And its body is not in several segments

And it has multiple cells for digesting food

And it is not permanently attached to an object

Then animal is jellyfish

51. If the animal is not a vertebrate

And it does not live in soil

And its body is not in several segments

And it has no multiple cells for digesting food

And it is not multicellular

Then animal is protozoa

52. If the animal is not a vertebrate

And it does not live in soil

And its body is not in several segments

And it has no multiple cells for digesting food

And it is not multicellular

And its shell is spiral shaped

Then animal is snail

53. If the animal is not a vertebrate

And it does not live in soil

And its body is not in several segments

And it has no multiple cells for digesting food

And it is not multicellular

And its shell is not spiral shaped

And its shell is protected by two half shells

Then animal is clam

54. If the animal is not a vertebrate

And it does not live in soil

And its body is not in several segments

And it has no multiple cells for digesting food

And it is not multicellular

And its shell is not spiral shaped

And its shell is not protected by two half shells

Then animal is squid
